**PRESS RELEASE**  
**Wednesday 8<sup>th</sup> May 2024**

**Chinese medical team offers free medical checks and treatment in Kamativi**

On Wednesday 8<sup>th</sup> May 2024, the 21<sup>st</sup> batch of Chinese medical doctors operating in Zimbabwe visited Kamativi Mining Company (KMC) to offer free Traditional Chinese Medicine and acupuncture diagnosis and treatment in Kamativi. Their medical visit benefited over 300 company employees, including community members.

The medical team scored the prevention and treatment of malaria, abdominal pains and cholera through distributing popular science brochures and PPT display explanations. The Chinese doctors also presented an assortment of medical supplies and accessories to KMC.

After providing free medical checks, the medical team went on to visit the local community clinic to conduct inspection and medical exchanges. KMC has previously assisted the local clinic to establish and improve the community's healthcare system, including emergency rescue operations.

KMC joined hands with the Chinese medical team to provide quality medical services not only to its employees but to the community at large. KMC is thus committed to serving and improving the Kamativi healthcare system through periodic health checks.

The visit by the Chinese medical team reflects the spirit and cooperation of a long standing relationship between China and Zimbabwe.
